10th IFAC Symposium on Advances in Control Education
Sheffield, UK, August 28-30 2013

Deadline for submission of proposals: January 1st 2013

ACE provides a forum for dissemination of best practice and research within in control education. We are soliciting proposals for papers, special sessions, demonstrations and other activities. Please contact the local organiser for any queries about your proposals.

Themes
We would like to encourage special sessions and papers in the areas of independent learning, web laboratories, the use of the internet in learning and teaching, preparing students for industry and sharing learning and teaching resources. Other topics of interest include, but are not limited to, the following:

- Teaching aids for control engineering
- Virtual and remote labs
- Open educational resources
- E-learning in control engineering
- Tele-operation
- Independent learning
- Centralized Internet repository for control education
- Virtual reality in control education
- Continuing control education in industry
- University-industry co-operation in control engineering education
- Teacher and student exchange programs between control labs
- Cultural and social issues of control education
- Challenges for control engineering curricula
- Internet-based control systems materials
- Embedded systems
- Control education using laboratory equipment
- International programs in control engineering education
